

34th Annual
ANGUS BULL SALE

MARCH 6TH, 2025
1:00 P.M. MST • DILLON, MT
DILLON LIVESTOCK AUCTION

Selling 110 Yearling Bulls

Bid Online at
www.frontierlivesale.com

PAP Tested <> Fertility Tested <> Maternally Minded <> Range Functional <> Easier Calving <> with lots of performance!

Welcome to the 2025 Split Diamond 34th Annual Value Added Black Angus Bull Sale!

Welcome Dear Friends, cattle enthusiast and our valued customers! This year marks our 34th year raising and selling Angus cattle. It truly is a great time to be raising beef, with an all-time demand for quality protein, it is a historic high and exciting time to be in the cattle business. The future looks bright with exceptional prices for calves, bred cows, pairs and it looks to be only to be getting stronger. What we are offering is an excellent choice for cattle producers that sell by the pound and still want to raise females to continue years of functional, efficient service. A great detail of thought and investment through new herd sires and donor cows has been put into these genetics to achieve just that. So when you study the bulls here, you know we have put every resource available to bring YOU the Best of the Best.

When you sell your calves by the pound, then you are going to appreciate weaning EPD's that are going to put more dollars in your pocket. Our weaning EPD's are well above the Angus' average. Our Best of the Best have been genetically tested and parent verified through either the Angus GS or Zoetis 50K to ensure the accuracy and predictability in our EPD's. You will notice that our catalog provides you with a calving ease star rating for each bull again this year for more information on the ratings, see page 4. Our strong maternal cow herd has been developed to ensure that calving ease and docility are a priority.

We are now in our 13th year of PAP testing our sale bulls to limit the exposure to our customers and us to high altitude sickness (Brisket Disease). Over the last five years, we have taken this one step further now by testing all the replacement heifers retained in the herd.

Since we started PAP testing, we are proud to say every year we have improved by having more animals below a 44 PAP score and less animals over 50. If you are in a higher elevation, we encourage you to read our guidelines and warranty on our PAP procedures on Page 3.

The Bulls completed a 100-Day performance test with a 3.2 lb. average daily gain to have a moderate growth rate. They were fed a high roughage diet of 1st and 2nd Cutting Hay and West Feeds Bull Developer pellet (no silage was fed). We felt this was a ration that closely resembles one that our customers will feed. The bulls being offered have been mercilessly screened and tested to bring you bulls that can carry the Split Diamond name. They have all been semen tested, scrotal measured, and PAP tested. All of the bulls are fully vaccinated and ready to go to work!

Steve & Linda

Hans, Diana, & Oakley

We would like to give a huge thank you to all our helping hands throughout the year. It would not be possible without our ranch crew of Nacho and Amy Rodriguez, Rachel and Tommy Krug, Garret and Sierra Pack, Sharmen Scafani and her family, and Ken Hartwig.

We welcome and encourage you to view the Best of the Best of this year's sale at the ranch until the Tuesday prior to the sale on Thursday, March 6th, or we will have the bulls available for viewing at the Dillon Livestock Auction up until the sale on Thursday at 1 PM MST.

We are sincerely grateful for your interest and we would like your business, but most of all we want your friendship. Your success is our success.

With warm regards,
Steve, Linda, Hans, Diana, Oakley and Crew.

34th Annual Black Angus Bull Sale

Thursday, March 6, 2025

Lunch at 11:30 am • Sale at 1:00 pm MST
Dillon Livestock Auction • Dillon, Montana

110 Yearling Bulls Sell!

SALE LOCATION

Dillon Livestock Auction, located 5 miles south of Dillon, MT on the Frontage Road east of Interstate 15

SCHEDULE

Bull Viewing – Tuesday, March 4th - Thursday, March 6th at the sale site.

Complimentary Lunch – 11:30 AM MST Thursday, March 6th, 2025

Provided by Jerry McDonald of Blacktail Station

Angus Bull Auction – 1:00 PM MST Thursday, March 6th, 2025

AUCTIONEER

Joe Goggins 406-861-5664

REPRESENTATIVES

Kurt Kangas, American Angus Assoc.. 406-366-4190

John Goggins, Western Ag Reporter. 406-698-4159

Devin Murnin, Western Livestock Journal.. 406-696-1502

HOTEL ACCOMMODATIONS

FairBridge Inn

580 Sinclair St. • Dillon, MT 59725 • 406-683-9809

Ask for the Split Diamond Ranch Bull Sale Rates

QR CODES

Use the QR Codes to view lot videos! Open the camera app on your phone and hold it over the QR code. A link will pop up to click on that will take you to the video for that lot.

DELIVERY

Free delivery of your bull purchases up to 500 miles from the sale site; beyond at cost.

VOLUME DISCOUNT

3 - 5 bulls 5% discount, 6+ bulls 10% discount. \$100 rebate per bull for hauling your purchases home on sale day.

RETAINED INTEREST

Split Diamond Ranch retains a 1/3 revenue share on all bulls sold in the sale. Purchaser has 100% possession and salvage value. Unless otherwise stated.

PAP TESTING

All bulls PAP tested. See page 3 for more details.

HERD HEALTH

Split Diamond Bulls are on a complete health program from birth until sale day. At birth, they receive Inforce 3, Alpha 7 C&D. At Branding, they receive Vista Once, Vision 8, Nasalgen 3 and Eye Site, plus Dectomax Injectable. At weaning time, they receive Vision 8/Somnus, plus a Somubac Booster and Ivermectin Pour On. In November, they received their Fuso Guard (foot rot) and Wart Vaccine with a booster to follow. In February they received Vista 5 VL 5. Complete fertility Screening performed by Dr. Ben Abbey with Pioneer Animal Health.

ALL Split Diamond Bulls have the BVD ELISA Test to identify PI Cattle. All Bulls tested Negative.

PERFORMANCE DATA

All bulls were performance tested. Complete, accurate performance and carcass EPDs are provided on every bull selling.

TERMS

Terms of the sale are cash, unless prior arrangements have been made with Steve Buckner.

FIRST BREEDING SEASON INSURANCE

All bulls will be covered 50% by Split Diamond Ranch if they are injured during their first breeding season. Breeding is defined as the 90-day period following the first turnout of the bulls. 50% of the value of the injured bull, minus salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2025.

EPDs

EPDs are current as of February 7th, 2025.

Updated EPDs can be viewed at www.angus.org.

Announcements from the auction block take precedence over any printed material.

Absentee Bidding

Phone Orders

Buyers unable to attend the sale may call or send their bids to the owners Steve Buckner or Hans Buckner. To discuss the sale offering, call us several days prior to the sale and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and pay only the bid price of the animal established by the auction. Bids are handled in confidence with SATISFACTION GUARANTEED on all orders.

FRONTIER LIVE SALE

This Sale will be broadcast live on www.frontierlivesale.com. To view a sale,

1. Create an account. If you have already done so, skip to the next step. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to your email account you provided. Please click the link in the email to activate your new account.
2. Once you click the link, your account will be activated.
3. At this point, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.
4. Once you see the auction you are interested in, click **Get Approved To Bid** for absentee and live bidding.
5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the auction. Now that you're approved you can participate in the auction and bid on its items.
6. Login on sale day with credentials provided at registration.

Call 866-313-0123 for tech help!

Approval will not
be given after 12 pm
MST Sale Day

**Your Satisfaction is
FULLY GUARANTEED
on Sight Unseen Purchases.**

PAP Testing

We know that testing at 5,000 ft in elevation is not the most ideal protocol. But we feel it is very important to find and limit the risk of High Altitude Disease (HAD). We have decided to do the PAP test at our home ranch in an attempt to get as correct information as we can concerning a PAP score to our customers increasing the odds in the selection of a bull suitable for high altitude use. Scores of less than 41 have a greater than 70% accuracy of remaining low and are a good risk for use in high elevation. Scores 42 – 46 should be considered moderate risk and difficult to predict high altitude use. Scores 47 and greater tested at the elevation of our ranch should not be used at high elevations. All these bulls should be retested once they have moved to their new home if high elevation is of concern to your operation.

All our replacement heifers and sale bulls were grazed at 6000 ft. or higher for the summer. We brought the bulls home in September to be weaned and developed them for the sale.

We have waited to perform the test until the majority of the bulls are 12 months of age, **evidence points to testing bulls at an older age (at or equal to 12 months of age)** will increase our accuracy levels of the PAP test. We should see accuracy levels in the 65% to 70% range even though the altitude at testing time is not at 6000 ft. or higher.

All the values will be available sale day and will be posted on our website www.splitdiamond.com for viewing before the sale. As with a lot of tests, this is not a concrete marker for High Altitude Sickness however we feel it is an important tool for recognizing problem genetics before they start. We have enlisted the expertise and guidance of Dr. Ben Abbey from Pioneer Animal Health who is one of 7 Nationally Recognized Vets to perform this test to be reported to the Angus Association. He has recently completed a continuing education program for the PAP testing protocol.

If you have any questions, Call Dr. Ben Abbey at: Office 406-683-9397 or Cell 406-660-1412.

HERE IS OUR GUARANTEE: If you buy a bull that has a PAP score of 44 or less. Take the bull home to your elevation and keep him at that elevation the required amount of time for a re-test. We will pay the cost of the re-test. Then retest the bull, if he does not give a satisfactory score at your altitude by a certified PAP testing vet we will refund you the purchase price and take the bull back. You can buy with confidence from Split Diamond Ranch that all our bulls are guaranteed.

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

Zoetis is pleased to announce HD 50K™ for Angus, a new genotyping platform developed in partnership with AGI for Angus seedstock producers. HD 50K™ for Angus replaces i50K™ and the previous version of HD 50K, and represents the latest advancement in Angus genotyping technology.

Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
 - more accurate selection
 - easier identification of genetic outliers
 - the ability to propagate young animals with confidence earlier in their lives

All of the bulls in the Split Diamond Angus Bull Sale have been verified using Zoetis HD50K.

Understanding EPDs

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Calving Ease: ★★

**Embryo Transfer

Production & Maternal EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

\$Values

Weaned Calf Value (\$W), an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Beef Value (\$B), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

Combined Value (\$C), an index expressed in dollars per head which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B). \$C is a linear combination of \$M and \$B. The formula to calculate \$C on any given animal is simple: $\$C = \$M + (1.297 * \$B)$.

Carcass EPDs

Carcass Weight EPD (CW), is a predictor of transmitting ability for hot carcass weight.

Marbling fat EPD (Marb), is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

Ribeye Area EPD (RE), is a predictor of the difference in square inches of ultrasound ribeye area of a sire's progeny compared to the progeny of other sires.

Fat Thickness EPD (FAT), expressed in inches, is a predictor of the difference in ultrasound fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement.

Scrotal Measurements

All of our sale bulls yearling data including weight, height, and scrotal measurements were done on January 28, 2025.

Calving Ease Stars Explained

To determine the calving ease is a multi-faceted attempt to predict the ease in which a heifer has the ability to calve on her own. We have used all the following to make a predictor for our customers to easily identify Bulls that would be suited for the use of breeding heifers. Actual Birth Weight, BW EPD, CED EPD, Genomic Scores, Dams Birth Ratios, Dams BW EPD, Sire EPD and past experience of calving our own heifers and cows.

★★★ = Suitable to breed most every heifer and all cows

★★ = Better suited for larger framed heifers that weigh over 950 at calving time.

★ = Not Recommended for heifers! Use only on cows!

Value Added Programs

ANGUS
THE BUSINESS BREED

COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®.

Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions.

A commitment to the female starts with MaternalPlus. Contact AGI at 816-383-5100 or agi@angus.org for more information.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

American Angus Association \$Value Indexes

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Connealy Expo was the High selling Surpass son in the fall 2023 Connealy Bull sale. A true calving ease bull with sleep all night qualities. Stems from a highly maternal cow family posting 10/14 total Pathfinder animals in his pedigree including 3 generations of Pathfinder cows.

If you want maternal and growth this is your bull.

Expo is a powerfully made, square hipped bull with extra rib shape and length. Also exhibits excellent carcass qualities without sacrificing scrotal.

We are very excited about Expo and what he has to offer. So far his calves have come quickly and easily with lots of vigor and go. Semen is available for your special projects.

Semen Available! Contact Hans for more information.

FIRST SET OF CALVES ARE ON THE GROUND NOW!
EXPECT TO SEE THEM AT OUR 2026 BULL SALE!
